

SOLAR 'N' SAT

CLASSIC 1000 – COMPOSTING TOILET

The Classic 1000 is the deluxe version of the Classic 750. The pedestal is fibreglass and a warm white colour. It is supplied with a honey oak timber seat. The standard toilet is supplied with a trolley to facilitate the rotation of the chambers. It has larger composting chambers than the Classic 750.

The **Classic 1000** is popular because of the attractive pedestal shaped much like a flushing toilet, coupled with the simplicity of design and ease of operation. **The Classic 1000 is approved in all states and is Australian Standards 1546.2 certified.**

Apart from the external vent pipe and absorption trench materials, which cost about \$80 to buy locally, the **Classic** range comes complete, **including pedestal and seat**. To install the Classic 1000 the **toilet floor must be a minimum of 1 m above the ground**.

Included in the standard Classic 1000 - 3 Package:

- Fibreglass warm white pedestal and timber seat.
- 3 composting chambers (85 cm high x 80 cm maximum diameter).
- Waste connecting chute (70 cm in length - can be cut by you to suit your requirements).
- Ventilation system including 12 volt air fan and transformer.
- Easy to follow installation and maintenance manual.
- Trolley

Price : \$2,930 ex-Brisbane factory Price: \$3,215 ex Solar N Sat Gin Gin

Capacity: 5-6 people on a permanent basis

The Classic 1000 - 2 Package includes all components of the Classic 1000 - 3 but has only 2 composting chambers. The 2 chamber toilet is only suitable for 3 people plus visitors. An additional chamber can however be added later should this be necessary.

Price : \$2,630 ex-Brisbane factory Price: \$2,855 ex Solar N Sat Gin Gin
