

SOLAR 'N' SAT

WEEKENDER – COMPOSTING TOILET

The split system **Weekender** is designed to provide a little more comfort to the Compact N-L where the installation of a split system is possible. The addition of a pedestal distances the user from the chamber and enhances the look of the bathroom. The Nature Loo **Weekender** comes with all the Compact N-L components plus a pedestal, seat and chute. Normally the height requirement beneath the floor is 70 cm but with most installations this could be reduced to 55 cm.
